DO NOT USE FOR BULBS

"One teaspoon goes a long way"

Gary Hewlett, retired broad-acre farmer at Tarro. Ox Heart tomatoes were not growing, started to pull them out and then decided to try 'Fabulous 335' on the remainder. They started to grow and he ended up with heaps of large tomatoes and those plants are still producing. He also grew corn and has always had trouble with grubs on the cobs, no such problems with using 'Fabulous 335' no more grubs and 2-3 cobs per stalk. He states that his cucumbers have gone berserk, spinach growing like mad, rockmelons are the best he has ever grown. Good results for such a hot dry time.

Fabulous

Fabulous Formula 335

Fabulous Formula 335 is a true NPK + Calcium fertiliser containing no trace minerals as is specifically designed for application as a FOLIAR SPRAY

Healthier soil, Healthier plants...

FOR COMMERCIAL USE

APPLICATION RATES

FOLIAR SPRAY METHODS ONLY

Apples, Pears, Melons & Peaches

Up to 4 applications after first fruit set.

Apply 2 litres/ha with a minimum of 200 litres water/ha.

Tomatoes, Strawberries & Berries, Cherries, Peppers, Potatoes

2-4 applications after fruit set.

Apply 3 litres/ha with a minimum of 200 litres water/ha.

Grapes

Up to 4 applications after fruit set.

Apply 2-3 litres/ha with a minimum of 200 litres water/ha.

Lucerne

1 application at 5-10 cm tall at 3 litres/ha with a minimum of 200 litres water/ha.

Cereal Crops

1 application at 20-30 cm tall at 2 litres/ha with a minimum of 100 litres water/ha

For best results, spray early morning as a fine spray.

Formula 335 combines Phosphate and Calcium together in a true solution without forming Tri-Calcium Phosphate.

TYPICAL ACTIVE CONSTITUENTS FOR EACH LITRE:

TOTAL Nitrogen (N)	5%
Phosphorous (P205)	16%
Potassium (K)	4%
Calcium (Ca)	5%

In 2019 we reduced our operation to a smaller block, in 2020 we started using FCMP Granular Fertiliser at 65kg/ha and our rep suggested using a new product, a liquid fertiliser -**Fabulous 335**. We treated a 20ha Barley crop and a 20ha Wheat crop (refer to pictures with drum, taken 8 days apart), we saw amazing growth rate and colour in dull and waterlogged crops. With no in crop chemical sprays, crops yielded over 5.5t/ha with minimal to no frost damage. At \$20/ha per application we saw massive benefits from Fabulous 335. Our 2021 cropping program will see trials using FCMP at 100kg/ha and Fabulous 335 will be used intensively this year.

Ken & Paula Purvis Gilgandra
