

# FLOWER BLEND

Use on All flowering plants including Roses, Hibiscus, Camellias, Natives and annuals for bigger, brighter flowers.

- More flowers
- Brighter colours
- Better quality and longer lasting
- Use every 8 weeks

**4kg Bucket**

Up to 14m<sup>2</sup>

**12kg Bag**

Up to 40m<sup>2</sup>

**22kg Bag**

Up to 73m<sup>2</sup>

A flower and plant conditioner containing 60 mineral elements including nitrogen, natural rock phosphate, potassium, sulphate, calcium, magnesium, iron, zinc, copper, boron, plant available silica and over 30 beneficial microbe and fungi species.

## What does it do?

Promotes a more robust, healthier root system, which delays petal fall and allows the plant to better withstand adverse conditions. Provides a balance of nutrients as required by flowering plants. This improves the depth of colour and quality of the flowers while enhancing the keeping qualities after picking.

## Where and when to use it?

In the preparation of all flower beds, at planting and around all established plants. Flower Blend has been blended specifically to enhance the flowering potential of all plants.

## How often do you use it?

**BEFORE PLANTING** in bed preparation

**ESTABLISHED PLANTS** generally, apply every 8 weeks until plant ceases to flower. When perennials have ceased to flower, re-apply when plants are pruned, then every 8 weeks until flowering ceases. More often if necessary.

## Other important information:

- ✓ Does not contain muriate, urea or super phosphate.
- ✓ Will not burn plant foliage or root hairs. Stabilises soil pH.
- ✓ Apply directly to soil and water well.
- ✓ Safe for Australian native plants.
- ✓ For best results use in conjunction with other Earthlife garden products.

## Typical analysis of Flower Blend

Nitrogen	1.5%	Magnesium	3.5%
Phosphate	2.5%	Silica	28.0%
Potassium	2.7%	Sulphate	2.0%
Calcium	13.5%	Plus 50 other micro nutrients	

## APPLICATION RATE

**FLOWER BED PREPARATION** 300gm/m<sup>2</sup> (3 handfuls) of Flower blend and lightly work into the soil and water, alternatively combine with Garden Mate.

**AT PLANTING** 25gm/5cm diameter of the hole (one tablespoon) Garden Mate in the hole. (Example: width of hole is 15cm, use 3 tablespoons) Apply 300gm/m<sup>2</sup> (3 handfuls) of Flower Blend after backfilling and water in thoroughly.

**ESTABLISHED PLANTS** 300gm/m<sup>2</sup>

**POTTING** 1-2 handfuls/300 mm pot diameter
