

Rock Minerals for Flowers **Earthlife**
 100% Guaranteed to Work **Microbial Rock Minerals** **VEGAN FRIENDLY** **Rock Minerals**

FLOWER BLEND
Feeds & Conditions ALL Flowering Plants

**MORE FLOWERS
 BRIGHTER COLOURS
 BETTER QUALITY & LONGER LASTING**

**Use on Rose, Azalea, Hibiscus, Camellia
 Annuals in fact all Species & See the Difference**

Available In

4kg Bucket
 Up to 14m² @ 300gm/m²

12kg Bag
 Up to 40m² @ 300gm/m²

22kg Bag
 Up to 73m² @ 300gm/m²

A flower and plant conditioner containing 60 mineral elements including nitrogen, natural rock phosphate, potassium, sulphate, calcium, magnesium, iron, zinc, copper, boron, plant available silica and over 30 beneficial microbe and fungi species.

What does it do?

Promotes a more robust, healthier root system, which delays petal fall and allows the plant to better withstand adverse conditions. Provides a balance of nutrients as required by flowering plants. This improves the depth of colour and quality of the flowers while enhancing the keeping qualities after picking.

Where and when to use it

In the preparation of all flower beds, at planting and around all established plants. Flower Blend has been blended specifically to enhance the flowering potential of all plants.

How often do you use it?

BEFORE PLANTING in bed preparation.

ESTABLISHED PLANTS generally, apply every 8 weeks until plant ceases to flower. When perennials have ceased to flower, re-apply when plants are pruned, then every 8 weeks till flowering ceases. More often if necessary.

Other important information

- ✓ Does not contain muriate of potash, urea or super phosphate.
- ✓ Will not burn plant foliage or root hairs.
- ✓ Stabilises soil pH.
- ✓ Best response, when spread on the soil and lightly raked, then watered-in thoroughly.
- ✓ Safe for Australian native plants.
- ✓ For best results use in conjunction with other Earthlife garden products.

Application rate

FLOWER BED PREPARATION 300gm/m² (3 handfuls) of Flower Blend and lightly work into the soil and water, or alternatively combine with Garden Mate.

AT PLANTING 25gm/5cm diameter of the hole (one tablespoon) Garden Mate in the hole. (Example: width of hole is 15cm, use 3 tablespoons). Apply 300gm/m² (3 handfuls) of Flower Blend after backfilling and water in thoroughly.

ESTABLISHED PLANTS 300gm/m²

POT PLANTS 1-2 handfuls/300mm pot diameter

Typical analysis of Flower Blend

Nitrogen	Phosphate	Potassium	Calcium	Magnesium	Silica	Sulphate
1.5%	2.5%	2.7%	13.5%	3.5%	28.0%	2.0%
Plus 60 other micro nutrients
