Planting and Growing Australian Natives

Garden Mate breaks up clay and soil compaction allowing water to penetrate while improving drainage, as well as stimulating fresh root and shoot production.

Garden Delight is ideal to feed and fortify natives while encouraging native bees and birds as well as helping to fortify plants against pests, rusts, and diseases. **Works well mixed 50/50 with Garden Mate**

Flower Blend is perfect for keeping the soil conditioned, improving flower numbers and size while improving nectar and pollen quality.

SUITABLE FOR ALL AUSTRALIAN NATIVES

Best Practice

1-2 handfuls of Garden Mate in the bottom of the hole when planting,

3-5 handfuls of Garden Delight/Mate mix around the plant when planting and then every 12-16 weeks.

3-5 handfuls of Flower Blend around the plant a couple of times a year.
