Planting and Growing Roses

Garden Mate breaks up clay and soil compaction allowing water to penetrate while improving drainage, as well as stimulating fresh root and shoot production. **Ideal for bare-root roses.**

Flower Blend is perfect for keeping the soil conditioned, improving flower numbers, size and colour as well as helping to fortify the rose against Black Spot, scales and aphids.

Best Practice

1-2 handfuls of Garden Mate in the bottom of the hole when planting,

3-5 handfuls of Garden Mate around the base when planting and after pruning.

3-5 handfuls of Flower Blend around the base every 10 to 12 weeks.
